“

Smart have assisted ourselves and our customers in better managing our currency requirements, from reducing transaction costs to hedging exposures. We would not hesitate to recommend their services.”

STEVE PLEACE – OPERATIONS DIRECTOR

Smart Currency Business

Smart Currency Business is a trusted, award-winning international money transfer specialist. We provide UK companies with bespoke currency exchange solutions to help them avoid financial risk and unnecessary losses due to currency market fluctuations.

We specialise in a number of industry sectors and have a strong reputation for helping fast-growing international businesses to boost their bottom line. To that end, we work closely with

businesses that share our goals of helping companies to succeed. Commercial lenders are a prime example, given the importance of cash flow in business growth.

“

Having this API automation solution makes it far easier to manage our transactions, as we can control when funds are actually dispatched to the suppliers. Smart Currency Business's cut-off times are a lot more forgiving than our previous provider's, which also helps us to pay suppliers quickly, and supports our relationships with them.

MIKE MUMFORD - COMPLIANCE OFFICER AND ACCOUNT MANAGER

Commercial Lending

Smart Currency Business has been leading the way in offering tailored solutions to commercial lenders for their currency transactions. From trade finance and invoice discounting through to asset-based lending, we fully understand the sector and variety of operations.

We appraise each business individually on its systems, processes and requirements, with a view to eliminating currency risk and optimising strategy. In our experience, implementation of one of our market-leading, bespoke strategies will bring your business technological scale, process efficiency and recognition from your clients. We have further defined the benefits in the table below:

	Your Business	Your Clients
'Straight Through' Efficiency	✓	✓
Pricing Transparency	✓	✓
Cost Reduction	✓	✓
Potential Revenue Stream	✓	X
Protecting Profits	✓	✓
Reporting	✓	(Optional)
Bespoke API*	✓	✓

** Unlike other API solutions, which only offer spot functionality, we have developed a mechanism that fixes the cost on both legs, thus eliminating all FX risk to both the lender and borrower.*
